

# ViVa Visibility for Vaccines

## QUICK REFERENCE: Creating a Campaign

ViVa enables you to add additional requirements that would have an impact on stock levels and consumption, such as campaigns or outbreak responses. The tool allows you to enter the number of doses per vaccine, as well as the duration of the campaign. The tool will then include this figure into the projected stock levels and enable you to visualize the impact of a campaign on future stock levels.

**1** From the Location Overview page, click on “Edit Data”

Product	Start date	End date	Doses	Edit	Delete
OPV	01 Sep 2018	15 Sep 2018	5,000,000	Edit	Delete
OPV	01 Sep 2018	15 Sep 2018	5,000,000	Edit	Delete
Measles	02 Aug 2018	04 Aug 2018	2,900,000	Edit	Delete

**4** Select the vaccine, enter number of doses, and start/end dates of the campaign. Press “save.”

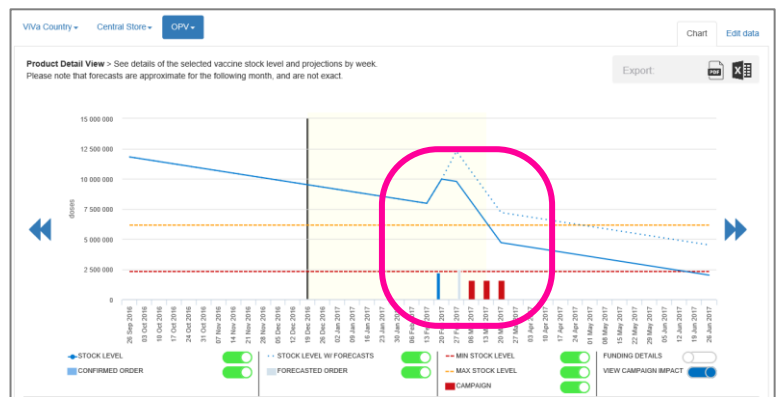

**5** Your campaign will now appear on the chart as red bars, for each week of the campaign.

Please note that there will be no change to the stock projection until you turn on “view impact of campaign”

**6** Your stock projection line will now adjust to account for the new campaign requirements.

To remove the campaign, return to the location settings and delete the campaign from the list.

*Please note that adding campaign requirements will have no impact on alert levels or recommendations. You must update the stock count for ViVa to recalculate alerts.*
